

## 3444-B-Super & 3648-SD

The model 3444-B-Super is similar to the 3444-B, but contains a larger fan and motor and has our typical rails and tops that are found on our larger tables. There are no intake dust ports or vise due to these modifications. This model comes equipped with an 80/20 cartridge filter that cleans with a 99.95% capture rate at 0.5 micron.
